

Beyond Down

COZMIX® WARM

FIBER MIX TECHNOLOGY

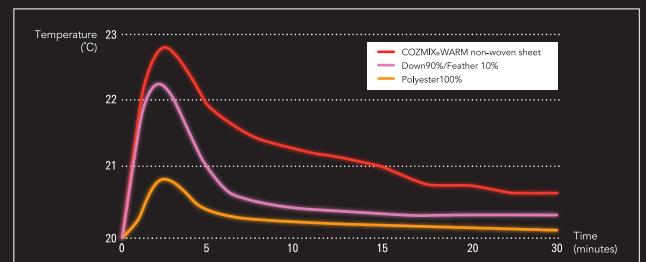

Special fiber mix technology (Patent pending)

Our special fiber mix technology provides high level of uniformity of heat generating fiber / polyester fiber mixing ratio. We are able to supply as fiber ball type and non-woven insulation sheet type.

Heat generating performance

COZMIX®WARM has superior heat generating performance to down90%/feather10% and other polyester100% insulations. (Temperature rise of polyester100%: 0.8°C, down90%/feather10%: 2.3°C, COZMIX®WARM: 2.7°C)

Tested by KAKEN Test Center (General Incorporated Foundation)

Deodorizing performance

COZMIX®WARM has excellent deodorizing performance to 3 gases causing bad sweat smell.

	COZMIX®WARM
Ammonia	-97%
Acetic acid	-94%
Isovaleric acid	-96%

Quick drying performance

COZMIX®WARM has excellent quick drying performance, it gets dried 2 hours earlier than down90% / feather10%.

	COZMIX®WARM Fiber ball type	Down90%/Feather10%
Drying time (minutes)	305	430

Traceability

It provides traceability of production record and keeping supply at high quality by using recycled material with GRS certification
